

1 - POLISHED ALUMINIUM COMPONENTS

For cleaning

Use soft cloth and glass cleaner. To polish, apply aluminium polishing paste wax following the instructions on the label.

For disinfection

The use of ethanol is recommended, while the use of sodium hypochlorite (0.1% - 0.5% sol.), hydrogen peroxide and benzalkonium chloride is not recommended.*

2 - POLYPROPYLENE PLASTIC COMPONENTS

For cleaning

Use soft cloth and non-abrasive neutral detergent. Do not use alcohol, solvent-based, acid or abrasive cleaners

For disinfection

Denatured alcohol, sodium hypochlorite (0.1% - 0.5% sol.), ethanol (70% sol.), hydrogen peroxide (0.5% sol.) and benzalkonium chloride can be used.*

3 - POLYURETHANE PLASTIC COMPONENTS

For cleaning

Use soft cloth and non-abrasive neutral detergent. Do not use alcohol, solvent-based, acid or abrasive cleaners

For disinfection

Denatured alcohol or ethyl alcohol in a maximum concentration of 5% is recommended.*

PRODUCT NAME

BeO fixed

TYPE

Fixed armrest

— **Adjustable armrest**

MATERIALS

Polished aluminium

— **Polypropylene plastic**

— **Polyurethane plastic**

Before disinfecting the entire surface of any component, it is advisable to proceed with tests on a small part of the product.

* Analysis of the effects resulting from the application of chemicals on product surfaces, performed by an accredited laboratory.
