CLEANING AND DISINFECTION GUIDE

1 - POLISHED ALUMINIUM BASE

For cleaning
Use soft cloth and glass cleaner. To polish, apply aluminium polishing paste wax following the instructions on the label.

For disinfection
The use of **ethanol** is recommended, while the use of **sodium hypochlorite**, **hydrogen peroxide** and **benzalkonium chloride** is not recommended. *

2 - PAINTED ALUMINIUM BASE

For cleaning
Use soft cloth and non-abrasive neutral detergent. Do not use alcohol, solvent–based, acid or abrasive cleaners

For disinfection
The use of **sodium hypochlorite** (0.1% - 0.5% sol.) is recommended, while the use of **hydrogen peroxide** is not recommended. **Denatured alcohol** and **ethanol** may generate some slight aesthetic changes. *

Before disinfecting the entire surface of any component, it is advisable to proceed with tests on a small part of the product.

PRODUCT NAME
North Point 4
—
North Point 5

TYPE
4 star base
—
5 star base

MATERIALS
Polished aluminium
—
Painted aluminium

* Analysis of the effects resulting from the application of chemicals on product surfaces, performed by an accredited laboratory.
