

PAINTED ALUMINIUM / STEEL COMPONENTS

For cleaning

Use soft cloth and non-abrasive neutral detergent. Do not use alcohol, solvent-based, acid or abrasive cleaners

For disinfection

The use of sodium hypochlorite (0.1% - 0.5% sol.) is recommended, while the use of hydrogen peroxide is not recommended. Denatured alcohol and ethanol may generate some slight aesthetic changes. *

NYLON PLASTIC COMPONENTS

For cleaning

Use soft cloth and non-abrasive neutral detergent. Do not use alcohol, solvent-based, acid or abrasive cleaners.

For disinfection

We recommend the use of sodium hypochlorite (0.1% - 0.5% sol.) or hydrogen peroxide. *

POLYPROPYLENE PLASTIC COMPONENTS

For cleaning

Use soft cloth and non-abrasive neutral detergent. Do not use alcohol, solvent-based, acid or abrasive cleaners

For disinfection

Denatured alcohol, sodium hypochlorite (0.1% - 0.5% sol.), ethanol (70% sol.), hydrogen peroxide (0.5% sol.) and benzalkonium chloride can be used.*

PRODUCT NAME

Epron

TYPE

Synchro tilt mechanism

—
Multi tilt mechanism

MATERIALS

Painted aluminium

—
Painted steel

—
Nylon plastic

—
Polypropylene plastic

* Analysis of the effects resulting from the application of chemicals on product surfaces, performed by an accredited laboratory.

Before disinfecting the entire surface of any component, it is advisable to proceed with tests on a small part of the product.
